EDUCATION

New Jersey Institute of Technology **Newark, NJ**
Bachelor of Science in Computer Science ***Expected Dec 2026***

SKILLS

Languages: Python, C++, C#, JavaScript, TypeScript, HTML, CSS, SQL
Frameworks & Libraries: Next.js, React, Tailwind CSS, Flask, Node.js, Unity
Databases: MongoDB, MySQL
AI & Tools: Gemini AI, Agentic workflows, AI API integration, Model deployment
Other Tools: Git, Auth0, My Vision Express, Docker (basic), VS Code

EXPERIENCES

Rekogni AI ***OCT 2025 – APR 2026***
Software Engineering Intern
- Contribute to full-stack development of AI-powered applications and internal tools.
- Implement agentic workflows that automate and optimize user interactions.
- Integrate AI models and APIs into production software to enhance functionality and performance
- Collaborate with cross-functional teams using Linear for project management, GitHub for version control, and Microsoft 365 for communication and documentation.

Invision Optics ***AUG 2025 – FEB 2026***
Administrative Assistant
- Manage and update patient and business data in My Vision Express, ensuring accuracy and data integrity.
- Digitize and index physical records in My Vision Express, enhancing accessibility and supporting digital workflows.
- Standardize digital and physical folder structures, streamlining information retrieval for staff

PROJECTS EXPERIENCE

JobTracker | React (Vite), FastAPI, Gemini 3, Supabase, Tailwind CSS ***MAR 2026 – PRESENT***
- Engineered a full-stack job search and resume analyzer using FastAPI and React to automate application tracking
- Integrated Gemini 3 AI to architect a matching algorithm that analyzes resumes against job descriptions for match scores
- Developed a persistent data layer with SQLAlchemy and Supabase for secure user data and application record storage.
- Deployed a responsive UI on Vercel with Tailwind CSS, featuring custom React notification systems and CI/CD pipelines

MedTracker | Kotlin, Android Studio, XML/Jetpack Compose ***JAN 2026 - PRESENT***
- Designed wireframes and UI layouts for all app screens, establishing the visual structure and navigation flow before development
- Designed and implemented XML layouts for all app screens including bottom tab navigation across Home, My Meds, Health Log, and Settings
- Researched RxNorm, RxCUI, and Gemini AI APIs for drug-to-drug interaction detection based on active prescriptions
- Built an Android app featuring a real-time adherence dashboard and symptom journal

DiscoMatch | NextJS, Tailwind CSS, Python Flask ***SEP 2024 – PRESENT***
- Implemented a matchmaking algorithm using Gemini AI to connect users based on skill and interests
- Designed a dynamic UI using NextJS and Tailwind CSS to provide an engaging user experience
- Integrated secure authentication with Auth0, ensuring safe access to the platform
- Utilized MongoDB to store user profiles, team data, enabling real-time updates and efficient data management

AWARDS/HONORS

GirlHacks 2024 Winner - Third place
Dean's List
Cohort: Education Opportunity Program Scholar 2022
Scholarship: Avanade Women in STEM - Awarded to women in STEM for academic excellence
Organization: Association of Computing Machinery, Women in Computing Society , Robotics club
